# Zaim El Yafi

## JUNIOR FULLSTACK DEVELOPER

I'm a Junior Fullstack Developer with a strong passion for building modern, user-friendly web applications from scratch. Skilled in both frontend and backend development, I combine technical problem-solving with a clean and intuitive design approach. Constantly exploring new technologies, I aim to deliver projects that are scalable, engaging, and impactful.

## EXPERIENCE

### JUNIOR FULLSTACK DEVELOPER | REMOTE

Sep 2024 - Present

- Developed multiple web applications including e-learning platforms, task management apps, and digital QR menu systems.
- Built full CRUD applications with modern stacks such as **React, Next.js, Tailwind CSS, Node.js/Express, and Firebase/Firestore**.
- Implemented secure backends with **Node.js, Express.js, and Firebase**, including authentication and API integrations.
- Created and maintained **system documentation (SRS, database schemas)** for scalability.
- Collaborated with peers on academic and freelance projects, applying Agile workflows and version control (Git/GitHub).

## CERTIFICATION

- **freeCodeCamp** - Responsive Web Design.
- **freeCodeCamp** - Front End Development Libraries.
- **Google Cloud Skills Boost** - Develop Serverless Apps with Firebase.
- **Google Cloud Skills Boost** - App Engine: 3 Ways.
- **Google Cloud Skills Boost** - Cloud Run Functions: 3 Ways.
- **Google Cloud Skills Boost** - Get Started with API Gateway.
- **Google Cloud Skills Boost** - Use APIs to Work with Cloud Storage.
- **Google Cloud Skills Boost** - App Building with AppSheet.
